SUMMARY

I am a recent graduate with a B.S. in Computer Science from UCI and I am currently seeking my first software engineering internship. I am a responsible, dependable, and quick-learning individual with a strong curiosity and a desire to learn everything. I have a passion for programming and believe that all software should be written using clean, efficient, and maintainable code. In my spare time I enjoy taking online courses on Udacity and learning new technologies. My goal is to someday work as a full-time Software Engineer.

EDUCATION

University of California, Irvine: B.S. Computer Science, 2016 (GPA: 3.4)
- Made dean's honor list at least once each year
- *Relevant Coursework*: Fundamental Data Structures, Algorithm Design and Analysis, Programming in C++, Information Retrieval, Discrete Math for Computer Science, Probability and Statistics

TECHNICAL SKILLS

- Solid knowledge of algorithms and data structures
- Intermediate programming skills in C/C++, Java, and Python
- Some experience with HTML, CSS, and JavaScript
- Familiar with the linux command line and git

PERSONAL/COURSE-ASSIGNED PROJECTS

Procrastination Timer   Jan 2017 - Feb 2017
- Built a chrome extension to monitor productivity while using chrome
